

Maths

In Maths this half term we begin by revising our understanding of our British money. We will be adding and taking amounts and working out change. After our money unit we will be looking at statistics, collecting, organising and reading data from a range of charts, tables and graphs.

Dates

Tues 3rd March - Class trip Chester Roman Experience
Wed 4th March - Parents Evening

Science

In Science we will be learning about changing states of matter - we will learn to identify, describe and group solids, liquids and gases. We will also be taking part in British Science Week - this is wonderful news as we have a number of aspiring young scientists in Chestnut class.

Tommy

The children will be with Tommy on Wednesday afternoons, they may wear their PE kits for this.

Class Book

We have started to read the popular and well loved novel 'Stig of the dump'. Did you read this at school?

English

We will be looking at the book 'Return' by Aaron Becker. This is a fascinating wordless book and will allow the children the opportunity to use their own rich and varied vocabulary to write setting descriptions. The children will continue to use expanded noun phrases with adjectives and prepositions to write descriptively. The children will be writing a range of sentence types; questions, exclamations, statements and commands as well as confidently applying a range of punctuation.

Homework

Maths - Tuesday (bring back by Friday)
Spelling - Friday (bring back by Tuesday)

Curriculum - 'What have we learned from the Romans?'

We will be developing our history skills learning about another time period, linking in our geography skills as we learn more about Britain and expanding our map skills as we plan to invade The Celts from Rome!
